PROJECTS

- **Hotel Management System :**
  - This is the project that i have done in Semester 5 as a task given by college faculty. In this project i have used PHP and HTML for project and SQL for database management.A hotel management system helps organize and streamline hotel operations, such as booking rooms, managing reservations, handling check-ins and check-outs, and tracking guest information. Its main goal is to improve efficiency and provide a better experience for both guests and staff.
  - Tech stack: **ReactJS**
